

Lab 1: Basic Python

Due date: Tuesday January 16, 11:59pm

1. During the lab we will look into basic python operations using the google class at <https://developers.google.com/edu/python>. To finish the lab you will need to do at least
 - Introduction
 - Strings
2. You will need to expand on the python files `string1.py` and `string2.py`, these can be downloaded from here: <https://developers.google.com/edu/python/exercises/basic>.
3. Package the file `string1.py` and `string2.py` into a folder with your first name and then compress the folder into a `firstname.tar.gz` archive (or `firstname.zip` archive).
4. Send the archive to Philip (pb12c@my.fsu.edu) by email before the deadline, she should be able to test your work by simply running a script such as

```
tar xvfz peter.tar.gz
cd peter
python string1.py
python string2.py
```
