

Homework #7

Algorithms II

Due: Monday November 18th , 2013

Write a title and a paragraph about the topic of your final project.

The paragraph should include an estimation of what work needs to be done (program, literature search, etc). If you have difficulties to come up with a topic, look at the class slides and the projects directory on the website. In the worst case, email me, but I will not be able to answer before Sunday.
